

POST CONFERENCE TOUR Campus Experience: University of Murcia Monday 18 September 2017

The University of Murcia (UMU) is a public research university located in Southeast Spain. It was founded in 1915 although its origins date back to the thirteenth century. This makes UMU the 10th oldest university in Spain.

UMU has 24 schools and 7 research institutes in 5 campuses, offering modern facilities and experimental sciences support service, two extensive libraries including a European Documentation Centre, as well as many specialised institutes dealing with different aspects of the scientific and humanistic world.

We also house Campus Mare Nostrum of International Excellence (CMN), a joint effort of international organisations, research centres, technology parks, companies, and the administration, which seeks to transform the Region of Murcia into a pole of international, high-quality education, science, business, and culture in the Mediterranean area.

For these and many more reasons, around 1000 students and researchers from around the world choose UMU every year to fulfill part of their studies.

So, please join us for this 1-day campus experience and get to know our institution and our charming town, Murcia, "The Orchard of Europe".
