

# Invitation ZEISS Celldiscoverer 7 & LSM 900 Airyscan, Your Automated Platform for Live Cell Imaging.

ZEISS Research Microscopy Solutions

ZEISS in collaboration with the IN Culture Unit and the Imaging Facility, is pleased to invite you to the presentation seminar that we will organize next March 27th about the new automated system for live cell imaging and the ZEISS Arivis software. With Celldiscoverer7, you combine the ease-of-use of an automated boxed microscope with the image quality and flexibility of a classic inverted research microscope.

This seminar is previous to the workshop that will take place in the IN installations at the end of April, so you will know about the technology behind, possible applications and image analysis .

Your ZEISS Microscopy Team

## Agenda:

March 27th – 11 a.m.

Presentation Seminar: ZEISS  
Celldiscoverer 7 & LSM 900 Airyscan,  
Your Automated Platform for Live Cell  
Imaging
